Bhushan Choudhary

Full Stack Engineer · Pune, Maharashtra

+91 9359240149 · choudhary.bhushan31@gmail.com · bhushan.xyz · linkedin.com/in/bhushanchoudhary-738109151

Summary

Full Stack Engineer with 2+ years of experience building features end to end, from SQL schema to React UI, on a production enterprise platform. Primary stack: React.js + Node.js with MySQL/SQL Server. Experienced in code reviews, defect investigation, deployments and writing technical specs. Use AI coding assistants daily for generation, refactoring, debugging and documentation, and review every line before it ships.

Technical Skills

Frontend: React.js, Angular, JavaScript, TypeScript, HTML5, CSS3, Storybook

Backend: Node.js, Node-RED, Java, Spring Boot, C#, ASP.NET MVC, Python

Databases: MySQL, SQL Server, MongoDB, Oracle; Knex.js query layer, schema design, query optimization

Cloud & DevOps: AWS EC2, Azure DevOps, Vercel, Git, GitHub

APIs & Architecture: REST APIs, JWT auth, role-based access control, SOA, Clean Architecture, microservices

Testing: Unit and regression testing, JUnit, TestNG, Selenium, code reviews

AI-Assisted Development: Claude API integration, AI tools for code generation, refactoring, debugging and documentation

Process: Agile, Scrum, SDLC

Experience

Full Stack Software Developer — Info Origin Technologies Pvt. Ltd., Pune *Oct 2024 – Present*

- Own features end to end on InfoQA, an in-house enterprise platform for test case management, requirement traceability, defect management and user story grids: data model, SQL queries, Node-RED/Node.js flows and React UI.
- Built and maintained the backend with Node.js and Node-RED flows in JavaScript, with a Knex.js query layer over MySQL and SQL Server; made queries work across both database dialects.
- Developed role-based visibility and accessibility rules across grids and forms, plus validation and business rules for environment management, tags and JSON generation for test automation.
- Worked across React, Angular and Spring Boot modules; built reusable UI components in Storybook.
- Investigated and fixed defects with developers and testers, from reproduction to fix and release.
- Reviewed teammates' code and wrote technical specifications and user guides.
- Used AI assistants day to day for code generation, refactoring, debugging and documentation, validating all output before merging.

Apprentice Software Engineer — Thinkbridge Software Private Limited *May 2024 – Oct 2024*

- Contributed to PSG Compass, a .NET enterprise application, using C#, ASP.NET MVC and SQL Server.
- Built RESTful APIs following SOA and Clean Architecture principles; optimized memory use and algorithms.
- Worked in Agile sprints with Azure DevOps, daily scrums and sprint reviews.

Projects

Electricity Bill Management System — Java, Spring Boot, MySQL, REST API · Live: e-bill-app.vercel.app

- Built end to end: bill generation, payment tracking and consumption monitoring, designed and deployed by me.

Student Management System (IACSD) — React.js, Spring Boot, MySQL, JWT

- JWT authentication, role-based access control and REST APIs backing a React front end.

Voter Application — Angular, Spring Boot, TypeScript, REST API

- Voter registration, ballot management and real-time results.

Education

PG Diploma in Advanced Computing (CDAC) — IACSD, Pune · Sept 2023 – Mar 2024

B.Tech — Sardar Patel College of Engineering · Mar 2020 – Mar 2023

Certifications

CDAC Certification (2024) · Java Certification (2023)
